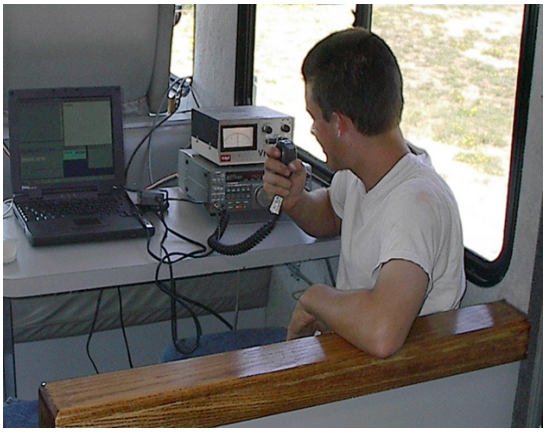
Amateur Radio License Classes

Ham Radio, also known as Amateur Radio, is a popular hobby and a service which licensed participants operate communications equipment, with a deep appreciation of the radio art. Now you can join this hobby of 730,000 U.S. Ham Radio operators in a 12-week course (1-night per week) conducted by the *Baton Rouge Amateur Radio Club (BRARC)*. Morse code is no longer a requirement for the FCC license, but still very popular. Several other modern communications modes including voice, data, and television are used today. Satellites, the internet, and radios are all part of the hobby. Join the fabulous, fun hobby of Amateur Radio by registering for a class today.



Technician Class License

Level I Course:

This is the entry-level course designed for anyone with an interest in communicating, learning operating procedures, and new technology. No pre-requisites are required. The course covers operating and communicating with hams, licensing regulations, radio safety, and the very basic fundamentals of radio and electronics. The course concludes with the 35-question multiple-choice FCC exam. Experienced Amateur Radio instructors conduct the classes and the testing.

January 26, 2017
Thursday evenings, through April 13th.

Thursdays, 6pm – 8pm
Baton Rouge Main Library
7711 Goodwood Blvd
Baton Rouge, LA 70806
Second Floor Technology Lab

There is no cost for the class, but it is recommended you obtain the class text, *Technician Class 2014-2018 by Gordon West, WB6NOA.* It can be obtained from BRARC (contact below) or at Amazon.com.
